AMENDMENTS TO THE CLAIMS

1. (Currently amended) A method for providing an integrated information system in

a system having at least one-monitoring device; In an integrated information system including a

central server in communication with two or more geographically distinct sites, a method for

processing monitoring device data, the method comprising:

obtaining monitoring device data from the at least one monitoring device two or more

geographically distinct sites, wherein the monitoring device data corresponds to at least one

monitoring device at each geographically distinct site;

obtaining one or more monitoring rules corresponding to the at least one monitoring

device, wherein the one or more rules establish a threshold for the monitoring device data;

processing the monitoring device data at the central server according to the monitoring

rules; and

generating an output corresponding to the processing of the monitoring device data,

wherein the output may include no output.

2. (Original) The method of Claim 1, wherein processing the monitoring device

data according to the rules includes determining whether the monitoring device data exceeds the

rule threshold.

3. (Original) The method of Claim 1 further comprising characterizing the

monitoring device data as asset data, resource data or event data;

wherein asset data includes data from an identifiable object that is not capable of

independent action;

wherein resource data includes data from an object capable of independent action; and

wherein event data includes data from a device having a defined state.

4. (Original) The method of Claim 3, wherein the monitoring device data is

characterized as asset data and device data.

-2-

5. (Original) The method of Claim 3, wherein the monitoring device data is

characterized as resource data and device data.

6. (Currently amended) The method of Claim 3, wherein obtaining one or more

rules corresponding to the at least one monitoring device includes:

obtaining asset rules if the monitoring device data is characterized as asset data;

obtaining resource rules if the monitoring device data is characterized as resource data;

and

obtaining device rules if the monitoring device data is characterized as [[device]] event

data.

7. (Original) The method of Claim 6, wherein the device rules establish a state

threshold for a rule violation, and wherein processing the monitoring device data according to

the device rules includes determining whether the monitoring device data indicates a particular

state.

8. (Original) The method of Claim 7, wherein the monitoring device data is motion

detection data and wherein the device rule threshold is the detection of motion.

9. (Original) The method of Claim 6, wherein characterizing the monitoring device

data comprises determining whether the monitoring device data includes data identifying a

monitoring device generating the data.

10. (Original) The method of Claim 9, wherein characterizing the monitoring device

data as asset data further includes comparing the data identifying the monitoring device

-3-

generating the monitoring device data to a set of known assets.

11. (Original) The method of Claim 10, wherein the set of known assets are

maintained in a database.

LAW OFFICES OF CHRISTENSEN O'CONNOR JOHNSON KINDNESSPILS 1420 Fifth Avenue

12. (Original) The method of Claim 9, wherein characterizing the monitoring device data as resource data further includes comparing the data identifying the monitoring device generating the monitoring device data to a set of known resources.

13. (Original) The method of Claim 12, wherein the set of known resources are maintained in a database.

14. (Original) The method of Claim 1, wherein generating an output corresponding to the processing of the monitoring device data includes generating a communication to one or more designated users.

15. (Original) The method of Claim 14, wherein generating an output to one or more designated users includes:

obtaining a schedule of preferred notification methods; and selecting a notification method from the schedule of notification methods.

16. (Original) The method of Claim 15, wherein the schedule of preferred notification methods includes an indication of one or more preferred communication methods based on a time of day.

17. (Original) The method of Claim 15, wherein each designated user is associated with a schedule of preferred notification methods.

18. (Original) The method of Claim 14, wherein generating a communication to one or more designated users includes generating a wireless communication to a designated user.

19. (Original) The method of Claim 1, wherein generating on an output corresponding to the processing of the monitoring device data includes initiating an action.

20. (Original) The method of Claim 19, wherein the action includes activating a physical device within a monitored premises.

-4-

21. (Original) The method of Claim 20, wherein the physical device generates a an output in a tangible medium.

output in a tangible ineatum.

22. (Original) The method of Claim 20, wherein the physical device is an audible

alarm.

23. (Original) The method of Claim 20, wherein the physical device is a microphone

and speaker assembly.

24. (Original) The method of Claim 1, wherein generating an output corresponding

to the processing of the monitoring device data includes processing one or more additional

monitoring device rules prior to generating an output.

25. (Original) The method of Claim 1, wherein the at least one monitoring device

includes a network access monitor and wherein the monitoring device includes data identifying

one or more users logged into a computer network.

26. (Original) The method of Claim 1, wherein the at least one monitoring device

includes a movement sensor and wherein the monitoring device data includes data identifying

whether an individual has passed through a monitored area.

27. (Original) The method of Claim 26, wherein the monitoring device data further

includes data identifying a particular individual passing through the monitored data.

28. (Original) The method of Claim 1, wherein the at least one monitoring device

includes a number of monitoring devices and wherein the monitoring device data includes data

identifying the location of individuals within a premises.

29. (Original) The method of Claim 28, wherein the monitoring device data further

identifies the identities of individuals within the premises.

LAW OFFICES OF CHRISTENSEN O'CONNOR JOHNSON KINDNESS^{erre} 1420 Fifth Avenue Suite 2800

Suite 2800 Seattle, Washington 98101 206.682.8100 30. (Original) The method of Claim 29, wherein generating an output corresponding

to the processing of the monitoring device data includes generating an output dedicated to a

particular individual identified within the premises.

31. (Original) The method of Claim 1, wherein obtaining monitoring device data

from at least one monitoring device includes obtaining the monitoring device data from a

distributed communication network.

32. (Original) A computer readable medium having computer-executable instructions

for performing the method recited in Claim 1.

33. (Original) A computer system having a processor, a memory and an operating

environment, the computer system operable to perform the method recited in Claim 1.

34. (Currently amended) A system for implementing an integrated information

system, the system comprising:

one or more monitoring devices corresponding to two or more geographically distinct site

and operable to transmit monitoring device data; and

a central processing server, the central processing server operable to obtain the

monitoring device data from the one or more monitoring devices at least one monitoring device

at each of the two or more geographically distinct sites;

wherein the central processing server processes the monitoring device data according to

one or more monitoring device rules and generates an output corresponding to the processing,

wherein the output may include no output.

35. (Original) The system as recited in Claim 34 further comprising at least one

premises server in communication with at least one of the monitoring devices and with the

central processing server, wherein the premises server is operable to obtain the monitoring

LAW OFFICES OF CHRISTENSEN O'CONNOR JOHNSON KINDNESS**** 1420 Fifth Avenue

1420 Fifth Avenue Suite 2800

Seattle, Washington 98101 206.682.8100

device data from the monitoring device and to transmit the monitoring device data to the central

processing server.

36. (Original) The system as recited in Claim 35, wherein the at least one premises

server includes two or more premises servers connected in parallel to each other.

37. (Original) The system as recited in Claim 34, wherein the one or more

monitoring devices are characterized as asset data, resource data or event data;

wherein asset data includes data from an identifiable object that is not capable of

independent action;

wherein resource data includes data from an object capable of independent action; and

wherein event data includes data from a device having a defined state.

38. (Original) The system as recited in Claim 37 further comprising one or more

rules databases for maintaining the monitoring device rules

39. (Original) The system as recited in Claim 38, wherein the one or more rules

databases include an event rules database for maintaining monitoring device rules corresponding

to event data.

40. (Original) The system as recited in Claim 38, wherein the one or more rules

databases include an asset rules database for maintaining monitoring device rules corresponding

to asset data.

41. (Original) The system as recited in Claim 38, wherein the one or more rules

databases include a resource rules database for maintaining monitoring device rules

corresponding to resource data.

42. (Original) The system as recited in Claim 34 further comprising one or more

output devices in communication with the central processing server, wherein the output devices

-7-

are operable to obtain an output from the central processing server.

LAW OFFICES OF CHRISTENSEN O'CONNOR JOHNSON KINDNESSPLIX 1420 Fifth Avenue

43. (Original) The system as recited in Claim 42, wherein the output devices include an audible alarm.

44. (Original) The system as recited in Claim 42, wherein the output devices include

a speaker and microphone assembly.

45. (Original) The system as recited in Claim 34, wherein one or more of the

monitoring devices communicate with the central processing server via a data network.

46. (Original) The system as recited in Claim 45, wherein the data network is the

Internet.

47. (Original) The system as recited in Claim 45, wherein the data network is a

distributed data network.

48. (Currently amended) A system for implementing an integrated information

system, the system comprising:

one or more monitoring devices operable to transmit monitoring device data from two or

more geographically distinct sites; and

central processing means for obtaining the monitoring device data from the one or more

monitoring devices, processing the monitoring device data according to one or more monitoring

device rules and generating outputs corresponding to the processing, wherein the outputs may

include no output.

49. (Original) The system as recited in Claim 48 further comprising data

communication means in communication with at least one monitoring device and with the

central processing means, wherein the data communication means obtains monitoring device

data from the monitoring device and transmits the data to the central processing means.

50. (Original) The system as recited in Claim 49, wherein the communications means

include parallel processing means obtaining and for data transmitting.

LAW OFFICES OF CHRISTENSEN O'CONNOR JOHNSON KINDNESS^{PECC} 1420 Fifth Avenue

Suite 2800 Seattle, Washington 98101

atte, washington 98

The system as recited in Claim 48, wherein the one or more 51. (Original)

monitoring devices are characterized as asset data, resource data or event data;

wherein asset data includes data from an identifiable object that is not capable of

independent action;

wherein resource data includes data from an object capable of independent action; and

wherein event data includes data from a device having a defined state.

(Original) The system as recited in Claim 51 further comprising means for 52.

maintaining the monitoring device rules

(Original) The system as recited in Claim 52, wherein the means for maintaining 53.

the monitoring device rules include means for maintaining monitoring device rules

corresponding to event data.

(Original) The system as recited in Claim 52, wherein the means for maintaining 54.

the monitoring device rules include means for maintaining monitoring device rules

corresponding to asset data.

55. (Original) The system as recited in Claim 52, wherein the means for maintaining

the monitoring device rules include means for maintaining monitoring device rules

corresponding to resource data.

56. (Original) The system as recited in Claim 48 further comprising one or more

output device means for obtaining outputs from the central processing means.

57. (Original) The system as recited in Claim 48, wherein one or more of the

monitoring devices communicate with the central processing means via data network means.

58. (Original) The system as recited in Claim 57, wherein the data network means

include a distributed data network means.
